

## COMPANY PROFILE

Whether you need a reliable source for quality wire and cable or customized solutions to improve the performance of your products, the best place to turn is New England Wire Technologies.

For more than one hundred years, we have designed, developed, tested and manufactured custom wire and cable solutions to meet the needs of engineers, scientists and technical professionals around the world. Our cumulative experience and in-depth knowledge make us the best partner you can have when faced with complex design and challenging projects.

### ONE-OF-A-KIND SOLUTIONS.

New England Wire Technologies creates highly customized wire and cable products for a diverse range of industrial, scientific and medical industries; all are designed to meet the precise requirements of your most demanding specifications. Many are one-of-a-kind. Our technical staff works with you every step of the way—from initial design and development to testing and manufacturing—to deliver quality custom wire and cable solutions you can rely on when your reputation is on the line.

### MAKE THE RIGHT CHOICE.

New England Wire Technologies offers you proven engineering and manufacturing expertise; everyone at New England Wire is committed to helping you improve the quality and performance of your products.

New England Wire Technologies started out as a manufacturing organization at the dawn of the telecommunications age and we've continually advanced the state of the art ever since. Today, we design and manufacture an extensive range of sophisticated wire and cable products—from multiconductor, superconductor and coaxial cable to Litz wire, braids, coiled cords, fine-wire strands and flexible interconnects.

### SPEED YOUR TIME TO MARKET.

Thanks to the expertise of our people and the true vertical integration of our manufacturing approach, we can ensure that your design-to-market curve is the shortest in the wire and cable industry. We design and build most of our own equipment and tooling, so we can offer a level of manufacturing agility that yields custom wire and cable products of exceptionally high quality in remarkably fast time frames.

### QUALITY YOU CAN COUNT ON.

New England Wire Technologies has earned both ISO 9001 and TS16949 registration—a testimony to the fact that quality control is the focus of every employee. We have the broadest and deepest in-house technical expertise and manufacturing know-how in the wire and cable industry so we're able to maintain the highest standards of quality every step of the way—from research to inspection of raw materials to inline testing.

In fact, the majority of ownership is held by our skilled and dedicated employees who are passionate about delivering intelligently designed, well crafted wire and cable products that perform best when they're needed most.

While this catalog provides you with an overview of our wide range of products and capabilities, we encourage you to visit [www.newenglandwire.com](http://www.newenglandwire.com), or contact our sales department by phone or e-mail to discuss your current challenges.

Discover how New England Wire Technologies can help you innovate, create, and accelerate the success of your business.

### WHAT'S INSIDE?

Overview	Audio/Video Cables
Custom Design & Trade Name Products	Microminature & Miniature Coaxial Cables
Multiconductor Cables	Power Leads/Flexible Interconnect Cables
Medical Cables	Litz & Winding Wires
Instrumentation/Test & Measurement Cables	Braids, Cables, Strands
Communications & Control Cables	Technical Reference
