

CUSTOM DESIGN & TRADE NAME PRODUCTS

OUR CUSTOM SERVICES INCLUDE:

DEVELOPMENT ASSISTANCE

New England Wire Technologies welcomes all opportunities to assist in the design, development, testing and manufacture of custom wire and cable products. If your requirements include materials that are not listed in our catalog, please contact us to review your specific needs.

CATHETERS

New England Catheter, our medical products group, draws on a unique set of core technologies to design and produce precision custom reinforced tubing built to the exacting standards of medical device organizations.

ASIA SALES AND MANUFACTURING

Our production facility in China has increased New England Wire's capacity by 50%. We can now better serve our customers with manufacturing operations in Asia through our sales office in Guangzhou City. Plus, we can cost effectively offer higher volume, less complex customized products to all our customers.

Off-the-shelf components may work for some applications, but when wire and cable are critical to the performance of your product, you can't settle for anything less than custom solutions.

With decades of research, testing and development under our belt, New England Wire Technologies is uniquely qualified to offer custom design, development, testing and manufacture of specialty wire products using a wide variety of materials. We employ our reiterative design process, concurrent engineering and rapid prototyping to quickly bring ideas from the drawing board to the production line—one solution at a time.

QUALITY CERTIFICATION

New England Wire Technologies has earned both ISO 9001:2000 and TS16949:2002 Registration, so you're assured that your custom wire and cable products meet the highest standards of the most demanding independent quality organizations.

RoHS COMPLIANCE

New England Wire Technologies is dedicated to offering technical solutions and superior materials that minimize environmental impact and maximize the performance benefits of our custom-designed, specialty wire and cable. We have identified the current RoHS status of our existing products and offer a variety of GreenLine materials to meet the needs of our customers who request compliance.
